EXECUTIVE SUMMARY

This deliverable contains of the report from the first TALOS project workshop with the end-users, that was held on 2-3 October 2008 in Warsaw, Poland.

The workshop was named 'TALOS Open Day' and combined with an End User Advisory Board meeting and a press conference, and was organized during the Border and Customs 2008 Exhibition.

The workshop was an occasion to present to the end-users the status of the project activities, with a special focus on the user requirements collection process. At the press conference the project was presented to the wide public, including Polish authorities and media representatives.

The main result of the workshop was gaining a valuable expertise from the end-users on the project objectives and activities carried on. Methodology of the user-requirements acquisition was discussed and evaluated positively by the end-users representatives present on the meeting. Overview of initial results of the surveys among the end-users was presented to the EUAB members.

Additional result of the workshop was the dissemination impact it had, via presentation of the project both to the end-users and the wide public. Numerous publications in local newspapers and TV news magazine followed the press conference.

This deliverable is directly connected to Deliverables 2.1: Initial user requirements specification and 2.3: User requirements specification. Indirect connections can be also found with other deliverables, especially relating to WP5, WP7, WP8, WP9 and WP10, but also to WP3, WP4 and WP6.

This deliverable is addressed mainly to project management bodies on strategic, executive and implementation level, as well as EUAB itself.

1 INTRODUCTION

TALOS first workshop was held in Warsaw (Poland) in Gromada Hotel, during the Border and Customs 2008 exhibition, at which TALOS project had its stand.

The workshop was called TALOS Open Day, and conducted as a combination of the press conference and an End User Advisory Board meeting, as well as WP2 meeting.

EUAB contributes to TALOS objectives as review and advisory body ensuring adaptation of the developed system to end user requirements. EUAB has crucial role in collecting end user requirements and scenarios development, which will be the basis for system and subsystems architecture.

At the press conference TALOS project was presented to the end-users, Polish state authorities and local media representatives, as well as wide public. Project objectives, goals and current course of actions were presented during the event.

At the EUAB and WP2 meeting the methodology for user-requirements collection was discussed and evaluated positively, along with an overview of the initial results of the surveys among the end-users in various countries.

In the following paragraph the agenda of the meeting and photographs documenting the event are included, as well as the list of invited guests.

The presentations given during the event are attached as the Appendixes to this deliverable.
